

TCL TV Setup: Installer SOP

What you need before starting:

- The TCL TV, powered on and connected to power
 - The site's Wi-Fi password (or a LAN cable already plugged in)
 - A second phone logged into the Dominate dashboard
-

1) Language and region

1. Select **English (United Kingdom)** as the language.
 2. On the next screen, scroll down and select **South Africa** as the region.
-

2) Initial setup

3. Select **Set up Google TV**.
 4. When it says "Set up with the Google Home app", scroll down and tap **Set up on TV instead**.
 5. If connected by LAN cable, tap **Continue**. If on Wi-Fi, select the correct network and enter the password.
 6. Enter the store Gmail account details when prompted.
-

3) Permissions and preferences

7. Tap **Accept** (Terms of Service).
8. Disable **Use Location** and **Help improve Google TV**, then tap **Accept**.
9. Tap **No thanks** (*Google Assistant setup*).
10. Tap **No thanks** (*Personalisation*).

11. Tap **No thanks** (*Live TV / channels*).
 12. Tap **No thanks** (*Subscriptions or additional services*).
 13. Tap **Confirm**.
 14. Press the **right arrow** on the remote to skip.
 15. Tap **Next**.
 16. Tap **Select all**, then **Agree**.
 17. Tap **Not now**.
 18. Tap **Next**.
 19. Tap **Done**.
-

4) Wait for Google TV to finish setting up.

20. If a **Skip** button appears at any point, press it.
 21. When it shows **Go to Google TV**, press it.
-

5) Enable Developer Options and Stay Awake

22. Press the **Home** button, then go to **Settings** (top right corner).
 23. Click **All Settings**.
 24. Scroll down to **System**, then tap **About**.
 25. Find **Android TV OS Build** and tap it **7 times** until you see "*You are now a developer*".
 26. Press the **back button** to return to System settings.
 27. Scroll down and tap **Developer options**.
 28. Find **Stay awake** and turn it **ON**. (*This prevents the TV from sleeping during long content playback.*)
-

6) Install Dominate

29. Press the **Home** button.
 30. Go to **Apps** and tap **Search for apps**.
 31. Type **Dominate** and tap the first result — it has a red "**D**," logo, published by **MyNoda**.
 32. Tap **Install**, wait for it to finish, then tap **Open**.
 33. A popup will appear asking about **Display over other apps**.
 - Tap **Allow**.
 - Scroll down the list to **Dominate** and switch it **On**.
 - Press the **back arrow** (top left) to return.
-

7) Register the screen

34. On your second phone (already logged into the Dominate dashboard), open **Google Lens**.
 35. Scan the **QR code** shown on the TV screen.
 36. When Lens shows the link, open it in the **same browser** that has the Dominate dashboard open.
 37. Type the **Player Name** using the naming convention: **Store Code Device Brand Model** — e.g. *PNP123 TCL 55P635*
 38. Select **Relative** layout.
 39. Select the correct **Playlist** for this screen.
 40. Click **Push Changes** and wait for Dominate to download the content.
-

8) Final verification

41. Restart the TV: Hold power button then click restart.
42. After reboot, confirm **Dominate opens automatically** without touching the remote.
43. Let a full playlist loop once with no interruptions before leaving the site.
